News Notes

Let every child see 'Africa Speaks'

• • •

Another week of real California weather for Sunny Alberta.

• • •

The picture of the year — "Africa Speaks—Saturday Only.'

• • •

Get your Christmas Cards Now. There is still time if you act quick.

• • •

Kenneth Scott was a Lethbridge visitor on Saturday of last week.

• • •

The Jungle brought it to you— "Africa Speaks" — Saturday Only.

• • •

Miss Orpha Vance spent Wednesday evening in Cardston with her sister.

• • •

Walter Rouse is home from the Lethbridge Hospital and is doing nicely following the second operation on his leg.

• • •

Mr. and Mrs. C. B. Smith and Mr. and Mrs. Owen Lee were at the Temple session at Cardston on Wednesday evening.

• • •

Mr. and Mrs. Wilfred Brandley, Mr and Mrs. Lloyd Oler, Mrs Bertha Oler all of Stirling accompanied Osborne Oler and Miss Eudora Fawns to the Temple at Cardston on Wednesday.

• • •

The Skating rink is now enclosed with an 8 foot board fence and there is almost enough cinders to have it ready to flood. The dressing rooms, bleachers etc, are in course of construction now.

• • •

Mrs. O. H. Snow, Miss Orpha Vance Orvin Hicken and Reed Kirkham were speakers at the Sunday evening Conjoint meeting in the Raymond 1st Ward. All of them had their subjects well in hand and were interesting. The musical numbers were also very good and thoroughly enjoyed.

• • •

40 students, ons of them the cook died from what is believed to be snake poison. After the mid-day meal the victims collapsed and died, and it was stated afterward that a snake had been found in the dish that the soup was afterwards made in.

• • •

A meeting of Scout workers was held here last Sunday when some of the problems effecting Scouting thru out the Stake were gone into at considerable length. It is hoped that Scouting, particularly in its more advanced divisions will benefit from the gathering.

• • •

Alma Hancock and wife, Byron Vance and wife, and S. I. May and wife spent Wednesday at the Cardston Temple, attending both sessions.

• • •

The roads between here and Cardston are not as bad as might be expected. They are not good, but the train can be made straight through without difficulty.

Wedding Bells

OLER — FAWNS

Osborne Oler and Miss Eudora Fawns both of Stirling were married in the Cardston Temple on Wednesday afternoon in the presence of friends and relatives. Pres. Edw. J. Wood officiating. Following the ceremony the young couple received the congratulations and best wishes of their friends. They will make their home in Stirling where they are both well and favorably known and where a wide circle of friends will wish them every success in their matrimonial journey.

STEVENS — SMITH

At the Cardston Temple Wednesday evening, O. Ray Stevens of Barnwell and Miss Thelma Smith of Raymond were united in the holy bonds of Matrimony Pres. Edw. J. Wood officiating. The young couple will make their home in Barnwell where the groom lives and is a highly respected young man. In Thelma going to live in Barnwell, Raymond will lose the services of a willing and talented musician and she will be greatly missed. The young couple have the best wishes of their many friends here in their future married life.

NEW MINERAL EXPECTED SOON

Calgary, Alta., Dec. 4;—Long and somewhat secretive Laboratory investigations are expected, shortly, to add a new mineral to the roster of the Dominion's products. Though research was carried on in university and industrial laboratories in the east, principally Toronto, manufacture is to be chiefly in the west.

The mineral is vermiculite, or as it is more commonly known, zonolite. Its potential uses are chiefly as insulation and as an acoustical treatment in buildings.

Samples of the raw material seen here were, in appearance and to touch like crude mica of dark green color. It is a silliate and insoluble in most acids. Coming from the mine, it varies in size from dust to pieces several square inches in area.

In the raw form, it weighs 144 lbs. to a cubic foot. But, once heat is applied to it, it expands enormously till it has a bulk weight of approximately 110 pounds per cubic foot. It is this peculiar characteristic, research workers say, which gives it its commercial possibilities. It also changes in color to a lustrous gold. In Calgary, tests have been made by grinding the mineral over different size wire screen, then firing it in a 20 ft. kiln.

"The economic value of zonolite," says Angus Graham, Toronto research engineer, who came west to aid in the experiments, "is attributable to its thermal and sound insulating properities, its ability to withstand high temperatures, its light weight and pleasing appearance.

He goes on to say that not only does it not burn but that tests show that it does not readily transmit heat. Canadian experiments are supported by higly technical investigations carried on by the bureau of Standards at Washington. The mineral was used as high temperture insulation for bake ovens and dry kilns, pipes and boilers.

Tests made by Prof. G. R. Anderson of the University of Toronto in his laboratory thers demonstrated zonolite's ability to absorb sound. The eastern scientist used it in the form of a lustrous gold plaster, three-quarters zonolite, one quarter wood pulp. His research shows that, at a tone frequency of 512, it has a sound absorptive coefficient of .25, in other and non-technical words, it soaks up sound and noises to a degree that makes its use feasible in treating this nuisance in buildings. Since psychologists are, at the same time, reporting the adverse effect of too much noise on the human system, the discovery of the mineral is timely.

So far, chief sources of supply are in the United States but traces of the material have alresdy been found in Canada and these are being carefully followed up. Potential devolopment is largey due to the work of Canadian engineers and scientists.

Possibilites of the mineral were discovered by accident E.N. Alley, while prospecting an old mine shaft for molybdenum and vanadium, placed a miner's candle in the wall of the shaft It touced a projecting piece of vermiculite. Noticing, with surprise, the expansion and change of color under the flame, he took samples. This led to the development.

Research work has been carried on with no publicity. Only now have the results been issued to technical papers. Nor will any of those linked with the work claims for anything revolutionary. They simply list the characteristics of a new and unique commercially, and generally. It has already been tested in the west as an acoustic treatment on theatres. One large Canadian concern is, however, sufficiently impressed by the results to sponsor continued experiment and test manufacturing processes in the west.

SPECIAL TRAIN

A Special Temple Excursion Train is planned for Wednesday of next week, leaving Raymond at 7:05 a.m. All passengers on this train will be enabled to get in two sessions at the Temple and return early in the night.

There has been a large guarantee posted to assure the train and everyone who can should see the Ward Chairman of their Genealogical Committee and give him their names, so that the total number to go may be ascertained in order to know just how many to count on.

KINDERGARTEN WILL ENTERTAIN

Hear Ye! Hear Ye! Hear Ye Have you ever seen toys walk or dolls talk? The Kindergarten Class of the First Ward Sunday School is having a real Christmas play next Monday night at 7:30 in the High School.

Your child will be there singing, dancing and talking. These children who do all the acting will be in costumes, waiting for their mothers and fathers to see and hear them. And oh how hard they have worked to bring the program to perfection; because they want to buy some little chairs for their Sunday School class

The admission is so small that everyone can surely afford to see their little ones take part on this program. All children under 15 will be admitted for 5c. All adults 15c., or two for 25c. Will you be there?

Miss Baker, representative of the Butterick Co., Ltd., publishers of the Delineator spent Saturday and Monday in Raymond, leaving on Tuesday for Warner.

NOTICE RE CARDSTON TEMPLE

The Temple will be closed from Dec. 23rd to January 6th, 1931. There will be regulsr sessions however on Monday and Tuesday, Dec. 22nd and 23rd at 9:30 and 5:30 with Baptism work on Tuesday from one to three o'clock p.m.

By order,
Edward J. Wood, Pres.

Cardston Scores Success

"Once in a Pirates Lair" was well received here on Monday evening and the Opera House was well filled with an appreciative audience made up of a large number from Magrath and Spring Coulee who came down on the special train with the performers.

The performance was commendabis in every respect and the work that it took to train a cast of this size in the various dances drills, choruses, etc. can only be appreciated by those who have taken part in such events

Space will not permit of anything and detailed discussion, we must suffice by saying that the leading roles were well interpreted by the players, and the solo work and speaking was good all the way through.

The orchestra accompsniment, directed by T. C. Jones, with Mrs. Spencer at the piano and Arthur Morgan assisting on the flute and piccolo, assisted materially in the interpretation of the story.

Leo Stutz and John Woslyng as electricians assisted by Owen Quinton Grant Thomas and Orson Daines had the lighting effects well worked out and made the scenes very effective.

Thus we could go on indefinitely but we must desist. Mrs. Smith as conductor has scored another huge success and the value of such enterprises to the community will last for years.

Every one on the cast is deserving of special mention but as this is impossible we will conclude with the hope that they will feel that in our opinion they all shared equally in the splendid and outstanding success here of "Once in a Pirates Lair". Come again Cardston, such offerings are always welcome in Raymond.

BOGUS CHECK ARTIST IS APRREHENDED

Constable Van Orman has received word from the A. P. P. Inspector at Lethbridge that C.W. Smith, the bogus check artist who passed three forged checks off here a month or so ago has been convicted and senteneed to three years in the Penitentiary at New Westminster, B. C. Smith had a long string of sliases, and had worked the forgey game in several places in B. C. and was finally tried and convicted in Golden. He will likely be brought back to stand trial in Alberta when his term expires.

News Notes

Andrew Paxman and daughter of Missoula, Mont., are here to spend the winter with Mr. Paxman's mother. Mr. Paxman used to live hore and his many friends are glad to welcome him back again.

ATTEMPT TO WRECK TRAIN

LETHBRIDGE—CALGARY PASSENGER STOPPED BEFORE OSTRUCTIONS ON TRACK HIT

What may have been a wilful attempt to wreck the Sunday morning passenger train from Lethbridge to Calgary occurred early Sunday morning soon after the train pulled out of the local station. Two ties were discovered on the track, one just west of the viaduct and the other just west of the overhead traffic bridge.

Engineer W. B. Sleighthoim of the Calgary train fortunately spied the ties as the headlight picked them out bringht to a stop before the obstructions were hit. The switch lamp at the Lindsay passing track had also been turned.

Officials are at a loss to know whether it was a prank or whether it was a deliberate attempt to wreck the passenger train. The case is being investigated by the police.

PRAIRIE PROVINCES ARE 25 YEARS OLD

Ottawa, Dec. 3, (Special to the Recorder)—It is just 25 years since the provinces of Alberta and Saskatchewan were created. At that time the population of Alberta was 185,000. It is now about 650,000. Saskatchewan in 1905 had a population of 195,000; now it is 867,000. The total area under cultivation in Alberta 25 years ago was 660,000 acres; in Saskatchewan 2,000,000 acres. In 1930 Alberta had 15,000,000 under crop and Sask. 30,000,000 acres. The dairy production of Alberta has advanced in value from $2,000,000 in 1905 to over $20,000,000 this year. Similar progress in dairying hasbeen made in Saskatchewan.

Progress has been equally as notieable in a number of other directions in each of the two provinces. In 1905 there was comparatively no manufacturing in either Alberta or Saskatchewan, now the value of the annual industril output is over $159,000,000 of which Alberta accounts for $100,000,000 and Saskatchewan $59,000,000

FORBIDDEN MIXTURE — RUM AND GAS

Drunken drivers of automobiles will not be entirely done away, but it will be made considerably more risky by the decision of the superior court judges in the Los Angeles jurisdiction to impose jail sentence and prison on terms henceforth in all cases of conviction. No matter what the "degree" of intoxication, the dispatch says—whether raoringly reckless, or just jovially "under the influence" there is to be but the one rule; If drunk, jail it is!

One can but hope the new rule will have all the efficacy its best friends expect for it. It is a rule which will commend itself to every sensible person, pedestrian & motorist. No sane and sober individual has any sympathy for or patience with a drunken man at the wheel. There is no safety anywhere in his vicinity. Jail is the proper place for him, not only when he is trying to drive, but also after he has done his driving. At no time must there be any allowable mixture or combination of whisky and gasoline.

But the trouble will be in defining the condition described as "drunken". Here the experts and authoritis are bound to differ, and who shall decide when doctors disagree? Would there be any particular injustice in trying for a while a reversal of the accepted formula, and, in case of doubt as between the defendant and the public, giving the latter the benefit of it?

Each of the two provines as a well equipped university, several high schools and many hundreds of public schools. From mere frontier towns of 25 years ago, Calgary, Edmonton, Lethbridge, Medicine Hat, Regina, Saskatoon, Moose Jaw, and other places have grown into well established and beautiful cities, with every advantage found in anp of the older cities of the new or old world.

These two provinces, the youngest of the nine which form the Dominion of Canada, have certainly acquitted themselves well since their admission into the family group a brief 25 years ago.

British Badminton Team

Here are the British Badminton experts who are touring Canada from coast to coast to measure their prowess against the best Canada can offer. They arrived recently on Canadian Pacific liner Duchess of Atholl and play in Ottawa, Moose Jaw, Winnipeg, Calgary, Vancouver, Victoria, Edmonton, Toronto, Kingston, Montreal and will sail from Saint John on the return trip about the middle of December. They are travelling across the Dominion by Canadian Pacific. From left to right they are: D. C. Hume, R. C. F. Nichols, Major E. A. Wiggs, president Quebec Badminton Association, J. F. Devlin, Sir George Thomas, R. M. White, R. L. Condy, editor Canadian Lawn Tennis and Badminton Magazine, and H. S. Uber.

GRANT FLEMING, M.D. — ASSOCIATE SECRETARY

THE EAR

The ear-drum lies at the inner end of the canal which leads into the ear from the outside. This structure is a membrane of considerable strength. It acts as a drumhead, picking up sound waves and transmitting them to the ossicles, the three small bones which lie behind it in the middle ear.

In addition to acting as a drum head, the ear-drum also serves as a barrier to keep out foreign substances. This is one reason why any break in the drum is serious as it exposes the middle ear to infection from without.

In order to hear, it is not absolutely necessary that the drum be intact. The extent to which any tear or hole in the drum may interfere with hearing depends upon the location and size of the injury.

Behind the ear-drum is the middle ear or tympanic cavity. Here are the ossicles, the three small bones forming a series of levers which pass to the internal ear the vibratvions received by the ear-drum.

The Eustachian tube, which connects the middle ear with the throat, opens into the middle ear. This tube serves as a passage for air and thus keeps the pressure within the middle ear, on the inside of the drum, the same as the air pressure on the outside of the drum. This equality of pressure is important for proper hearing

If the Eustachian tube becomes blocked through inflammation or other causes, air does not get in and hearing is interefered with. If there is infection of the nose or throat, it may spead to the Eustarhian tube, and there is grave danger that if the nose is blown too strenuously, some infection will be forced up the tube and will cause disease of the middle ear. The nose should not be blown forcefully at any time, but to do so when the individual is suffering from a cold in the head is to invite trouble of a very serious nature.

The mastoid cells which open into the middle ear have nothing to do with hearing. They are similar to the head sinuses which drain into the nose. They are important, because, in so many cases, when there is infection of the middle ear, this infecton spreads to the hollow cavities of the mastoid, the bony prominence situated behind the ear. When this occurs, we find a condition called mastoiditis, which is serious and requires immediate care.

Prevention of these conditions lies in giving attention to the nose and throat. Diseased tonsils and adenoids are often responsible for abnormal ear conditions. Prompt and proper treatment of colds, measles and scarlet fever prevents the complication of middle ear disease. Earache should never be neglected or regarded as merely requiring home remedies; it calls for skilful care if mastoid disease is to be prevented and hearing preserved. Care in blowing the nose, at all times, is fundamental in ear health.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

RAISE YOUR SIGHTS

We sometimes think that some people have about decided there's nothing to a doughnut but the hole. We have cried poverty and hard times so long we think there will never eb any thing else.

True it is, there is a depression, but we do not believe that the universal cry of hardtimes in our midst is entirely justified. There is a pay roll in our midst that represents more cash every two weeks than some of our neighboring towns will see all winter. We have had a fair share of the beet money that has been paid out, and in several ways we are sitting better than most surrounding districts and to use a slang phrase "Sitting on top of the world".

Being happy won't make you any more money, but it will keep your face shorter, the corners of your mouth up instead of down and add years to your span of life.

Its easy enough to be happy,
When the world goes along with a song,
But the man worthwhile is the man who can smile,
When everthing goes dead wrong.

Smile! Smile! Smile! It will pay you big dividends.

Mr. and Mrs. Ern Shafer were Sunday dinner guests of Mr. and Mrs. Reg. Cooper.

• • •

Mrs. J. S. Smith and S. O. Low were in Raymond Saturday evening making arrangements for the present stage of "Once in a Pirtaes Lair."

INTERESTING LINKS IN CANDA'S HISTORY

One of the more humorous and amusing exhibits which can be seen at the Dominion Archives at Ottawa is a set of old prints which portrays a sliding party to Montmorency Falls in the good old days when tobogganing was a far more popular sport than it is now. This set is priceless if day though no doubt it was to be seen on many a parlor wall in old Quebec a hundred years ago. The six pictures are each about a foot high and eighteen inches long and are framed and hung in order on a large panel in the public room. They bear the name of Roberts and Reinhold, of Montreal, and were reputed by Gen. E. Desbarats of Ottawa in 1870.

The set is labelled "A Trip to Montmorenci" and each picture has the description printed underneath. The first tells trst "Capt. Buzbie drives Miss Muffin" and shows three old-fashioned cutters, each drawn by a single horse, going along a country road. In the last sleigh is the prim Miss Muffin, and standing beside her is the Captain. The second picture shows "how they climb up the cone" which was a cone of frozen spray from the falls on the Montmorency River which is an almost forgotten place for since water power has been developed on the river there is not enough water falling to form this historic cone. Captain Buzbie is ahead, reaching down his hand to Miss Muffin's feet and she is holding on to his shoulders and her large skirt and red petticoat are spread out around her, and trailing behind.

"On the way home they get off the track and Capt. Buzbie would like very much to know where they are." The poor horse is half out of sight in the snow, and the moon is high in the sky. The fifth picture tells that "assisted by some obliging habitants they regain the road" but poor Miss Muffin in the mean time, is seated in a deep snow drift and Buzbie is out walking, leading the horse, and following two young men who are evidently showing him here he should be.

The last picture shows that "they get home at last" and they are standing at the open door of a typical old Quebec house under an old-fashioned street light, and an old couple is standing in the door-way. A frightened-looking woman in white flannell is peering over the shoulder of an old gentleman who is wearing a dressing gown and slippers and carries a lighted candle.

The pictures are very unusual in their coloring and outline but every line is expressive. One glance tells that they were not drawn in our generation, and the details impress you with the history and romance of old Quebec.

LETTER OF APPRECIATION

TO EVERYBODY IN RAYMOND

Raymond, Dec. 8, 1930.

To the Editor,
Raymond Recorder,
Dear Sir:—

We wish to thank everyone in Raymond for the interest they have taken in our boy, Walter, since he lost his leg at the Factory. Thank you Messrs Rurk, F. R. Taylor and Bobbie Linkous for the help you gave him at the time of the accident.

We also wish to thank the following, Wilford Palmer, Mr. and Mrs. R. W. Tollestrup, Mr. and Mrs. Thos. K. Roberts, Mr. and Mrs. Teddy Gray, Mr. and Mrs. J. Miller, for taking us over to Lethbridge in their cars to see him.

We also thank M. and Mrs. S. B. Caru for the gasoline, and not forgetting Dr. and Mrs. G. W. Leech for their valuable services rendered. We remain,

Yours forever,
Mr. and Mrs. G. W. Rouse.

Chas. H. Walton is able to be up and around now, and his friends rejoice with him in his recovery.

Here and There

(655)

Officially cinsing the 1930 shipping season as far as inward bound Quebec terminus ships are concerned, Canadian Pacific liner Empress of Australia docked at Ancient Capital November 21, carrying back from the Imperial Conference Premier Ferguson of Ontario, Hon. Hugh Guthrie, Minister of Justice; Hon. C. H. Cahan, Secretary of State, and Hon. Thomas Chapais, Canadian delegate to the League of Nations.

Dressed poultry shows are being held in Regina on December 10th and in Saskatoon on December 11th for the purpose of arousing friendly competition in poultry production among the farmers of the province and further to advertise the poultry industry, according to W. Waldron, provincial markets commissioner. Mr. Waldron said that money prizes and special awards are to be given at these shows.

Little Julian Veboh, of Princeton, B.C., six years of age, has accepted foster parenthood of his 2½-year-old sister, Marie, and his 11-month-old brother, Mat, across the Atlantic on Canadian Pacific liner Montcalm, while their father treks back to his wifeless home in the mountains. The children were turned over to their grandmother at Cherbourg and will be taken to Prague, Czechn-Slovakia.

Headed by the Rt. Rev. Andre Lefebvre, Bishop of Mung Po, China, four priests and eight sisters, composing the largest missionary party to leave Canada for the Far East this year, left recently from Vancouver by S.S. Empress of Asia. They will join missions in Japan and Manchuria as well as China.

That the British and American people should assist the Kuomintang Nanking Government in the continuation of its difficult task of drawing China together, is the opinion of Col. Haley Hall, D.S.O., British Customs Commissioner, late of Tientsin, interviewed recently while en route to London, England, by Canadian Pacific Railway. "The brains, military power and general ability are to be found in this Southern Government, and only when China is reorganized will business conditions become stabilized," he added.

It is just 25 years since the provinces of Alberta and Saskatchewan were created. At that time the population of Alberta was 185,000. It is now about 650,000, Saskatchewan in 1905 had a population of about 195,000; now it is around 867,000. Total area of land under cultivation in Alberta, 25 years ago, was 660,000 acres, and in Saskatchewan, 2,000,000. To-day the two provinces have 15,000,000 and 30,000,000 acres under crop, respectively.

Two big bull moose—one of them one of the finest this year to come out of New Brunswick forests—and six buck deer were the trophies of the hunting party headed by Bob Shawkey, late manager of New York Yankees. Harry Rice, Yankee outfielder; Benny Bengough, former Yankee catcher, now with Milwaukee, and John Kracke, New York sportsman, were the other members of the party and all were successful in getting game.

The Southern Alberta honey crop this year will reach at least 750,000 pounds or almost double what it was a year ago, according to latest advices. The quality this year is said to be very high.

DEAN LAMB - - RAYMOND

WHEN WINTER COMES

With the colder weather the wise parent will be taking time by the forelock, and looking well to the ways of her household. Children of tender years are particularly susceptible to the changes of climate and "register" in their bodies the rises of temperature that are observable when Chinook winds blow.

According to the day so shall the diet be, it has been said. When winter comes is the time for nourishing foods of body-building energising quality. The engines of the body, like that of our motor car must burn the right type of fuel to enable us to carry on most efficiently. In correcting the errors of a careless and unbalanced diet lies the secret of a restored health and strength in many cases.

While the world's shop windows are filled with the wonderful products of the earth, garnered from all quarters of the globe, it is cetainly a reproach to find how many women pass the day by for the delicatessen store at the corner where ready made meals are so often inadequate in the very building material that should be presented to the family table.

You are invited to study your family's needs now winter is here, and for that purpose the Red Cross offers free a valuable book entitled "The Family Food Supply." Write to Civic Block, Edmonton.

Let Your Children Share in Canada's Greatness

CANADA is youthful, growing—continually growing. At present she is third among all nations in per capita wealth, the best place in the world in which to live.

You would, of course, like to start your children on life's journey equipped to take advantage of the great opportunities which will be offered them.

Then, save regularly for the future of your children and deposit your savings in a bank. When your children start out for themselves you can so establish them in life that they will face the world confidently. And they should become substantial and prosperous citizens.

The road to your children's future is open at every branch of The Canadian Bank of Commerce.

THE GRADE EIGHGT NEWS

Once upon a time, not long ago a Public School reporter walked into the grade Eight room at R.H.S. A great crowd was gathered in the aisle The reporter inquired of a bystander what the commotion was. The reply was, "Someone is getting hung." The reporter was trying to get into the crowd when the cry arose 'He's hung.' The crowd soon dispersed and the reporter looked for the hanged-man. He could find nothing but a drawing, by some great unknown artist, and an unfinished word below it. Soon a great silence and upon inquiring why it was so, the poem answered. "The Crimson Manual." After a few more inquiries the reporter copied this poem from the original written by Miss Pack;

MY LITTLE CRIMSON MANUAL

In my little Crimson Manual its written plain and clear
That who would dare to talk in school has said good-bye to fear;
For they who've dared to break the rule do tell a woeful tale,
For the work they found they had to do caused them all to wail.
"It's silence, silence, first and last, the Crimson Manual showeth,"
The eighth grade student daren't reply, It's silence well he knoweth.

IN SCHOOL

ARITHMETIC SECTION

We are afraid Mr. Hicken is subject to spells, for he said we made him sick, with our poor response in accuracy.

Mr. Hicken:—"Ina, why can't you multiply like Ivan?"

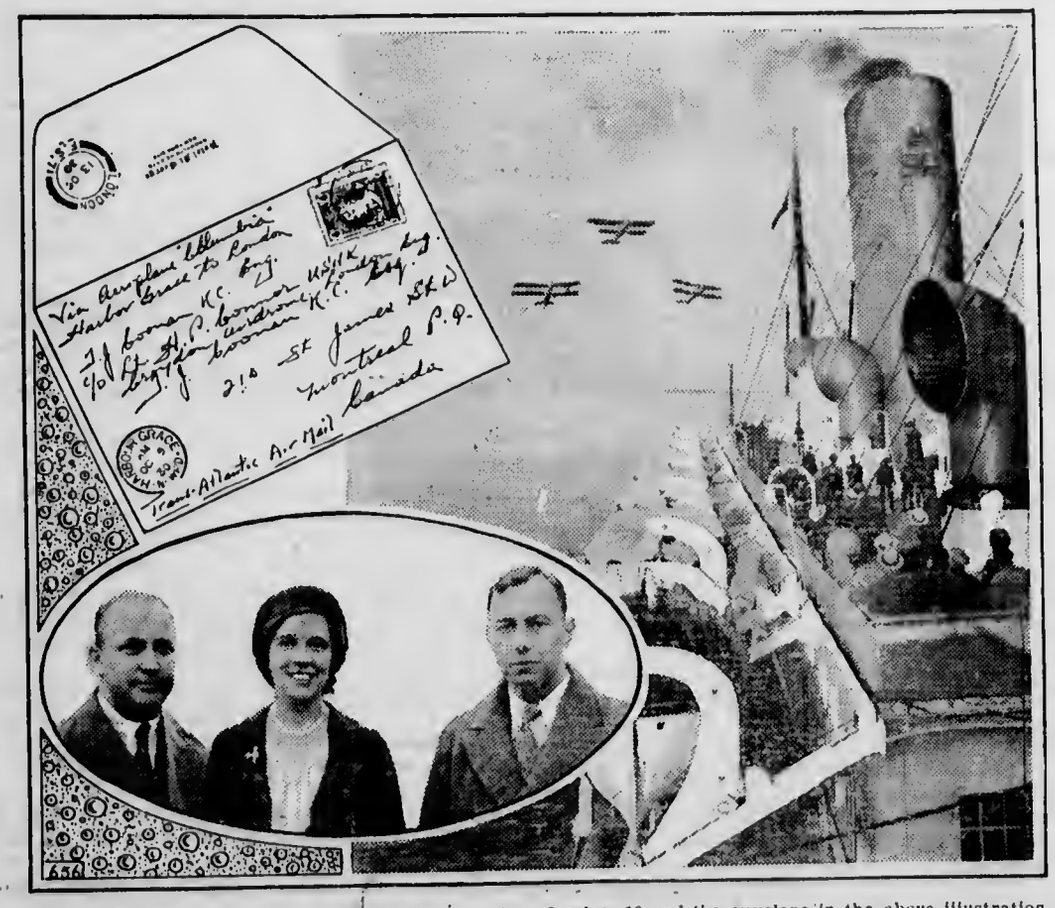
Ina:—"Because, Mr. Hicken, I've noticed that rats multiply more rapidly than common sense people."

AGRICULTURE SECTION

Miss Pack: "How would you make hens lay perpetually?"

Alma: "Hit them a well directed

Planes Welcome Heroes of the Air



First Canadian to cross the Atlantic in a heavier-than-air machine, Captain J. Erroll Boyd, and his American navigator, Lieut. Harry P. Connor, had a royal reception by land and air when they arrived in Montreal recently aboard Canadian Pacific liner Duchess of Bedford. Their historic flight commenced September 13 from St. Hubert airport near Montreal and they landed the same day at Charlottetown, P.E.I. Thereafter contrary weather delayed the adventure but eventually they took off from Harbor Grace, Newfoundland, October 9 and 24 hours later reached Treseo, one of the Scilly Isles. They were in London October 12 and the envelope in the above illustration shows dates of receipt and delivery corresponding to above times. Five airplanes met the Duchess of Bedford down the river and of these, three, representing the Montreal Light Aeroplane Club, are shown welcoming the flyers and the ship. Captain Boyd was met by his wife when the ship docked at Quebec and came up the river with him. Photograph shows him and Mrs. Boyd and Lieut. Connor. A civic reception was accorded the airmen and thousands listened in to their short addresses over the radio.

Here and There

(661)

Among the events of major importance to distinguish the coming winter sports season in Quebec will be the International Dog-Sled Derby to be held February 19-21 over a 120-mile course. It is expected Emile St. Godard, four times winner of the trophy, will defend his title. The Masquerade Ball at the Chateau Frontenac will be another high light on February 20. Other events will be the International Convention of Snowshoe Clubs from Canada and New England and the annual ice canoe race through the floes of the St. Lawrence about the middle of February.

The sporty seaside lay-out of the Victoria Golf Club where the third annual mid-winter golf tournament will be staged from February 23 to 28 came in for unstinted praise from Gene Sarazen, former United States open champion, and Al. Espinosa, of Chicago, interviewed recently. "I thought Victoria would be a land of ice and snow around this time and that Vancouver Island was a suburb of the frozen north," he said. His visit provided him with one of the surprises of his golfing career and both climatically and from the golfing point of view, Victoria was in both his and Espinosa's opinion ideal.

Making fast time in handling the annual inbound movement of the fruit, now as much a part of the Christmas board in western Canada as the turkey or mistletoe, a Canadian Pacific train of 26 cars carrying about 60,000 boxes of Japanese oranges reached Field recently after making the run through the mountains from Vancouver in fifteen minutes less than scheduled passenger train time. By mid-December it is calculated that 700,000 boxes of these oranges will have been delivered.

Colorful Yuletide pageantry, including the ceremony of bringing in the boar's head and Yule log will be observed at the Empress Hotel, Victoria, Christmas Day and carol singers, a chef in Elizabethan costume attended by page boys and a court jester in cap and bells will accompany them through rotunda and dining room to the place of honor where the Lieutenant-Governor H. Randolph Bruce who is sponsoring the celebrationa, will be seated.

Last week 970 letters came in one day to the radio office of the Canadian Pacific Railway from Melody Mike fans. They came from cities, towns and villages all over Canada and included many from the United States. It is an all-Canadian radio feature declared by radio station people to be, with one exception, the most popular feature on the air today.

The Emperor of Japan is among the recent new customers for British Columbia pure-bred poultry. A consignment of selected birds which sold for $4590, from some of the best poultry farms in British Columbia, was recently shipped to the Imperial farms. Each of the hens in the consignment has a record of 300 eggs or better per year.

Entered in competition with several countries, an exhibit of game trophies from British Columbia recently won highest award at the famous Leipzig (Germany) Fair. It included giant moose, deer, wapiti, sheep and goat heads and hides of fur bearing animals.

The Mutuals a.e preparing a play for the 23 of Dec. We invite you all t come.

Mr. and Mrs. Hugh Westcott were visiting M.. and Mrs H. R. Thompon last Tuesday

Miss Williams from Cardst n has been visiting in Welling since Monday

MEASLES

....Of all the c mmunicable diseases with which the human race has to contend, measles is the most readily spread. It is essentially a disease of childh od, and very few escape it Rarely seen under five months of age it reaches its greatest incidence between the sixth and seventh years.....

The younger the child, the more ser ious is the condition. Among the communicable diseases of childhood, measles ranks second as a cause of death, and approximately ninety per cent of deaths from measles occur in children under five years of age.

Because measles is a common disease, it is generally not taken seriously by parents, many of whom seem to regard it as an annoying experience which has to be gone through, as has the cutting of teeth.

This attitude of regarding measles as a trivial condition is not justifiable true it is that the vast majority of children who contract the disease results. It is also true, however, that measles destroy many lives. It may not appear that the child died of measles; in many cases it will be said that death was due to broncho-pneumonia. This is correct, but the child would not have developed bronchopneumonia if he had not contracted measles.

Among the children who recover from an attack, there are many who will have some permanent damage done to eyes, ears, lungs heart and other parts of the body. It is also observed that the general loss of resistance due to an attack of measles seems to favour the development of tuberculosis and so we not infrequently see that measles gives tuberculosis a chance to establish itself in the child.

This serious picture of measles is presented in order to cause parents to realize why measles should be regarded seriously. The younger the child, the more serious the condition, so we should make every reasonable effort to prevent young children, particularly those under three years of age, from coming in contact with any one suffering from the disease.

It is a well-established fact that if children with fever or acute colds are put to bed, and the condition later turns out to be measles, such children because they have been kept warm and at rest in bed, are more apt to escape the serious complications. This suggests that bed is the place for the child who is sneezing, or who has a running nose and watery red eyes. The condition may not be, measles but it very often is, because measles begins with the same symptoms as the common cold and, in both cases the child should be put to bed.

The Only Man that Ever Lost On Advertising was the Man Who Never Advertised.

News Notes

• • •

D. H. Elton was the chief speaker at the Second Ward Conjoint Sunday evening speaking on the subject "Success." The large audience thoroughly enjoyed him, as also the musical and other numbers on the program.

• • •

A benefit Party was held at the O.K. School Thursday night for Mr. and Mrs. Hulgeson who lost their home by fire Thanksgiving morning. Those present donated liberally and Mr. and Mrs Hulgeson wish to thank all who helped them and also the Kanadien Kids who played for the dance without charge.

DID YOU EVER STOP TO THINK

DON FRANCISCO, VICE PRESIDENT AND GENERAL MANAGER OF THE PACIFIC COAST OFFICES OF LORD AND THOMAS AND LORD AND THOMAS AND LOGAN, SAYS:

THAT advertising, by creating new desires, has raised our standards of living.

By keeping before the American public the better things of life, advertising has awakened within the average American new incentives for industry.

To live better is a dominating impulse in American life, and, to achieve it, people must work harder and earn more.

SPENDING MONEY FOR BETTER THINGS—KEEPING MONYY IN CIRCULATION—IS ONE REASON FOR AMERICAN PROSPERITY

Notes from the A.C.

The literary program commenced with a fine piano solo played by Miss E. Zebell. This was followed by a humorous little wedding trip pantomime with Miss J. Connor in shirt and pants as the bridegroom. Apparently she knows her mechanics. The "Wick Pick" paper was next read by W. Wolfrey and enjoyed by all. Mr. Walker then showed some 3,000 feet of motion picture film which concluded the program.

A. Melchin, who was in charge of our Hereford exhibit at the Toronto Royal returned recently with the blue ribbon. Congratulations Mr. Asplund and Mr Melchin! We are also this week sending to the Claresholm College a carload of Hereford Steers, Oxford sheep and Holstein cows in return for a carload of Ayrshire cattle, Shropshire sheep and Yorkshire hogs. Our livestock judging classes will thus be well supplied.

They are plowing on the school farm today, and we are hoping that the mild weather will last until the end of Xmas holidays.

Visitors from Edmonton this week have been Donald Douglas, superintendent of farms, Mr. Cook from the Dept. of Health and Mr. Kayser of the Dept. of Extension.

All members of the staff were invited to the home of Mr. and Mrs. Longman Sunday afternoon and were treated to a dinner of dinners, followed by a good, old-fashioned visit.

The Singer Sewing Machine demonstrator has introduced the girls to mechanics this week in the form of attachments which hem, bind, tuck, ruffle or pleat.

The girls have been very busy in the kitchen this week preparing the Christmas cakes and other "goodies" for the coming season.
